Date: August/14/2017

Anticipated Changes

We anticipate that we will report the following significant change in the results of operations from the same period of the last fiscal year:

*Revenue.* Sales for the three months ended June 30, 2017 were \$2.8 million, a decrease of \$7.5 million, when compared to sales for the same period of the prior year. As a percentage, sales decreased by 73% for the three months ended June 30, 2017, when compared to total net sales for the same period of the prior year.

Sales from apple-related products as a percentage of total sales were 1% for the three months ended June 30, 2017, as compared to 18% for the same period of the prior year. The absolute amount of sales were \$0.03 million for the three months ended June 30, 2017, a decrease of \$1.8 million, when compared to the sales of \$1.9 million for the same period of the prior year, mainly because of a sharp decrease in the unit price of apple-related products in the international market and a decrease in sales volume due to heavy competition. The Company sold approximately 460 tons of concentrated apple juice in the three months ended June 30, 2017, compared to 1,219 tons of concentrated apple juice in the same period of 2016. Most of our concentrated apple juice was sold directly or indirectly to the international market. In 2017, international demand of concentrated apple juice from China has continued to drop. According to the data provided by Chinese Customs, the amount of exported concentrated apple juice from China declined by 7% in year 2016 as compared to 2015, and the unit price of exported concentrated apple juice from China declined by 10.8% in May of 2017 as compared to the same period of 2016. Over the past three years, the purchase price of fresh apples has increased, but the sales price of concentrated apple related products has remained low. Because of the negative trends in the international market and estimated lower margins, our YingKou and Huludao Wonder factories did not operate their concentrated apple juice production facilities in 2016 and the six months ended June 30, 2017, which caused a lower

inventory of concentrated apple juice and required us to purchase supply from third-party manufacturers to meet demand.

Sales from concentrated kiwifruit juice and kiwifruit puree as a percentage of total sales were 4% for the three months ended June 30, 2017, and June 30, 2016, respectively. The absolute amount of sales were \$0.1 million for the three months ended June 30, 2017, a decrease of \$0.3 million, when compared to the sales of \$0.4 million the same period of the prior year, primarily as a result of lower demand and a decrease in the amount of products sold in the second quarter of 2017 as compared to the same period of 2016.

Sales from concentrated pear juice as a percentage of total sales were 4% and 9% for the three months ended June 30, 2017, and June 30, 2016, respectively. The absolute amount of sales were \$0.1 million for the three months ended June 30, 2017, a decrease of \$0.9 million, when compared to sales of \$1.0 million for the same period of the prior year, mainly because of a decrease in the unit price of the concentrated pear juice and a decrease in sales volume due to lower demand. We sold 1,149 and 1,314 tons of concentrated pear juice during the second quarters of 2017 and 2016, respectively.

Sales from our fruit juice beverages as a percentage of total sales were 90% and 53% for the three months ended June 30, 2017, and June 30, 2016, respectively. The absolute amount of sales were \$2.5 million for the three months ended June 30, 2017, a decrease of \$3.0 million, when compared to the sales of \$5.5 million for the same period of the prior year, primarily due to due to a decrease in sales volume as a result of heavy competition in the China market.

Sales from other products were \$0.01 million for the three months ended June 30, 2017 as compared to \$1.5 million for the same period of prior year. The sale from other products for the three months ended June 30, 2016 was concentrated orange juice. We do not expect continued sales from other products as customers' orders related to other products are not stable.

*Gross Profit.* The consolidated gross profit for the three months ended June 30, 2017 was \$1.3 million, a decrease of \$1.9 million, from \$3.2 million for the same period of 2016, primarily due to a decrease of dollar amounts of sales from all of our products.
